# TOUGH TRUCKS FOR CONTAINER HANDLING APPLICATIONS

Hyster® are the experts in Laden Container Handlers, and we produce the ultimate tough trucks for the most demanding areas of operation, offering truly innovative solutions to make your operation run smoothly.

Hyster® has a long history of developing truck solutions to meet the particular requirements of our customers in every industry around the globe. We continue to lead the market in answering the very specific challenges of container handling environments, helping to keep our customers at the forefront of their industry.

## Innovation

Through a continuous product development programme, Hyster® Laden Container Handlers benefit from sophisticated technological advances that significantly reduce your cost of ownership and maximise operational efficiencies.

## TECHNOLOGY THAT DELIVERS

Hyster® trucks are designed with low lifetime cost of ownership in mind. Well-integrated systems developed with our carefully selected high quality suppliers help to deliver maximum levels of economy and reliability. This new generation of Laden Container Handlers achieves the best fuel economy levels in the market, with increased savings on fuel consumption of up to 20%.

A rigorous design and test process specifically applied to the Container Handler series of Hyster® trucks ensures that they work harder, longer and faster to keep your business operating ahead of the competition. These powerful trucks deliver a smooth operation you can rely on even in the toughest environments.

### Integrated systems

All Hyster® Laden Container Handlers are engineered with durable state of the art components working in harmony to provide precise control and smooth shifts, helping to enhance operator comfort and maximise productivity.

ENGINEERED TO EXCEL

ROBUST AND HIGHLY DURABLE BOOM IS DESIGNED  
TO STACK UP TO 5 HIGH AND 3 ROWS DEEP

# OUTSTANDING VISIBILITY

Hyster® Laden Container Handlers feature the Hyster 'Vista' cab, an industry-leading ergonomically designed workspace which delivers the best levels of driver comfort and offers superb all round visibility to increase both productivity and operator confidence. The specially contoured counterweight and rear boom supply design provides clear sightlines for reversing operations.

### Precise control

Clear and well-positioned displays keep the operator in touch with precision load control and critical engine performance at all times.

### OPERATOR COMPARTMENT

THE CAB DESIGN HELPS MINIMISE NOISE AND VIBRATION LEVELS FOR THE OPERATOR AND THE SUPERIOR SEATING AND GENEROUS SPACE ENSURES MAXIMUM COMFORT, HELPING TO REDUCE DRIVER FATIGUE.

**CLEAR SIGHT**

THE CLEVERLY POSITIONED CAB  
OFFERS THE MOST COMFORTABLE  
LINE OF VISION FOR STACKING.

**EASY ACCESS**

LARGE RUNNING BOARDS ARE DESIGNED  
FOR A HIGH LEVEL OF SLIP-RESISTANCE AND  
PROVIDE EASY SNOW AND DIRT REMOVAL ON  
EITHER SIDE OF THE TRUCK.

# SUPERIOR SPREADER AND OPTIONS

Hyster® Laden Container Handlers feature supremely reliable chainless spreaders with a hydraulically activated vertical twistlock system. The gantry mounting system increases the residual capacity of the truck for better economy, and automatically adapts to handle loads from trailers or uneven ground.

This durable design offers distinct advantages, including two parallel telescopic beams, assuring maximum overlap. Beam sections are positioned to absorb both vertical and the very considerable horizontal forces.

## Control and protection system

Sophisticated systems monitor the state of the spreader at all times. Indicator lights confirm when the spreader is correctly seated, locked or not locked. Each signal is a precondition for the important protection functions of the spreader. Such as twistlock activation, telescoping and lift interrupt.

## TECHNICAL INFORMATION

- Automatic locking occurs when the spreader is correctly positioned on the container. Unlocking is only possible by pushing a button in the cab.
- Twistlock module features indicator lights (1 red, 2 orange and 1 green) on the spreader and in the cab to ensure safe and productive operation.
- Powered pile sloping (optional) enables mechanical sideways articulation to handle containers from or onto a sloping surface.
- Mechanical twistlock interlock helps to ensure that twistlocks are fully engaged on all 4 corners prior to lifting a container.
- The lift-interrupt system feature helps prevent lifting a container with partially engaged twistlocks.
- A container counter is on the spreader.

# COMPONENTS YOU CAN RELY ON

Hyster® Laden Container Handlers comprise the most durable and reliable components, which are easily accessed for servicing and routine maintenance operations. All our trucks feature clean and clear routing of wires and hoses, and on board telematics facilitates preventative maintenance planning and reporting to ensure maximum uptime, performance and reliability for your fleet.

### World-class parts and service support

With genuine Hyster replacement parts and accessories delivered fast, we are your one-stop source for over 2 million lift truck parts and accessories.

SERVICE ACCESS  
LIGHTWEIGHT, ALUMINUM FLOOR PLATES  
ENABLE EASY SERVICE ACCESS.

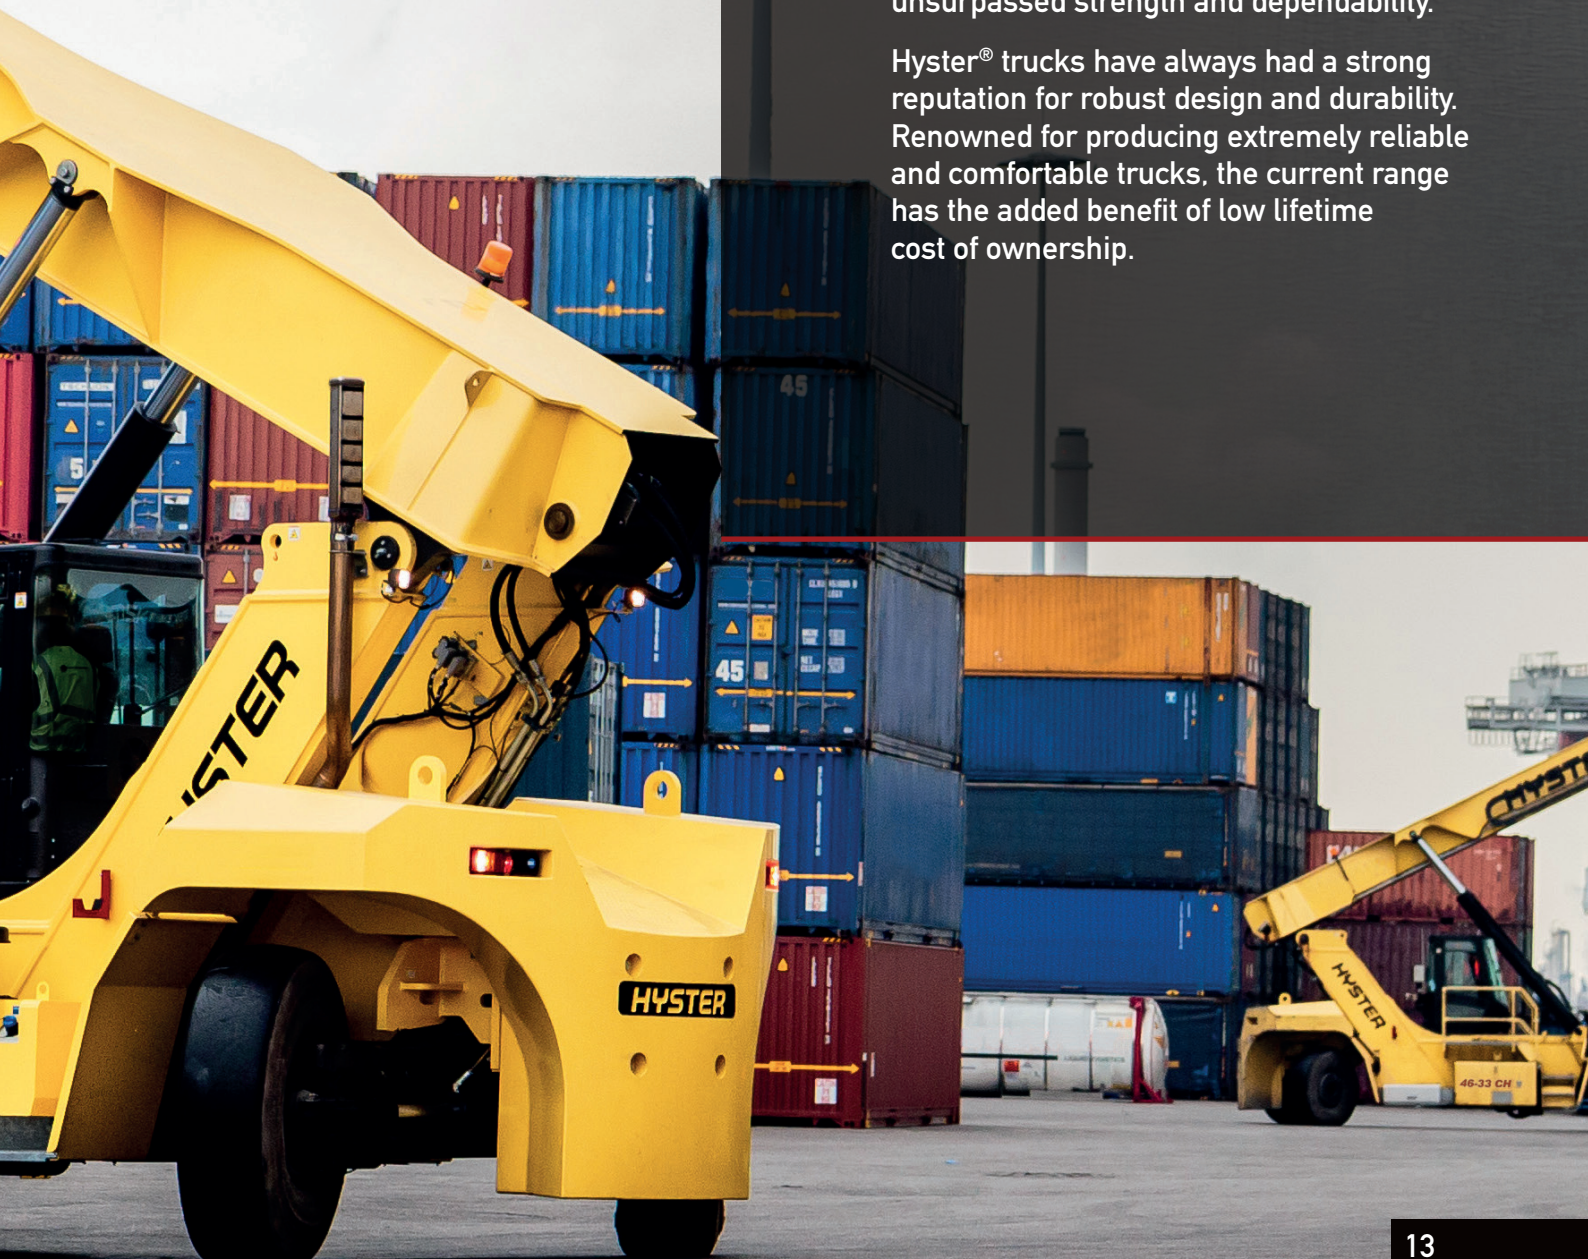

## INNOVATION YOU CAN TRUST

Hyster® has been conquering the world's most demanding applications for more than 80 years. A continual and rigorous programme of research and development means that our trucks are always at the forefront of technological excellence. Our world-class testing facilities ensure that each truck is designed to meet the most stringent quality controls, giving you the confidence to rely on Hyster® for unsurpassed strength and dependability.

Hyster® trucks have always had a strong reputation for robust design and durability. Renowned for producing extremely reliable and comfortable trucks, the current range has the added benefit of low lifetime cost of ownership.

LADEN CONTAINER HANDLERS

## GLOBAL OPERATION

A world leader in the manufacture of materials handling equipment, Hyster® offers a comprehensive range of Big Trucks including Heavy Duty Forklift Trucks, Empty Container Handlers, Laden Container Handlers and ReachStackers, all supported by a global parts supply operation to meet your materials handling requirements.

### Global Advantages

Hyster customers benefit from the expertise and resources of a worldwide manufacturing organisation with a global approach to product design, manufacturing, supply-chain administration and global distribution network.

We are able to maximise economies of scale and achieve consistent quality. At the same time, the company retains the flexibility to tailor products and solutions and to adapt production capacity in line with regional market demands.

### Tailored Solutions

A large proportion of Big Truck sales require special engineering and Hyster has a highly-experienced engineering team actively supporting specific application requirements.

## DEALER NETWORK

Our Dealer Network offer support in fleet management, parts supply, capital procurement and specialist training. Our carefully chosen dealers understand customer requirements and operating environments, and will assist in selecting the right lift truck and provide fast, reliable support.

## SERVICE SUPPORT

Your local Hyster® dealer offers a flexible, customised and comprehensive maintenance plan based on each truck's operating environment. Service programmes include scheduled inspections and maintenance, backed up by responsive on site service.
